```
#include<stdio.h>
#define MAXSIZE 50
int arr[MAXSIZE],index=0,nofelements;
void append(int data)
{
arr[index] = data;
index++;
nofelements++;
}
void traverse()
{
for(index=0;index<nofelements;index++)
{
printf("%d->",arr[index]);
}
}
void prepend(int data)
{
int i;
for(i=index;i>0;i--)
{
arr[i] = arr[i-1];
}
arr[0] = data;
index++;
nofelements++;
}
void insert(int data,int pos)
{
int i;
for(i=index;i>pos;i--)
{
arr[i] = arr[i-1];
}
arr[pos] = data;
index++;
nofelements++;
}

int getnofelements()
{
return nofelements;
}
```

```
int main()
{
int n;
append(5);
append(6);
append(7);
prepend(8);
prepend(9);
insert(4,2);
traverse();
n = getnofelements();
printf("nof elments:%d",n);
return 0;
}
```

Output:

1. 9->8->4->5->6->7->nof
2. elments:6
